

500w monocrystalline silicon photovoltaic module

Overview

What is a cworth 500W mono solar panel?

Technical Specifications: The Cworth 500W Mono Solar Panel offers highefficiency energy generation with advanced monocrystalline technology. Designed for a nominal voltage of 48V, this durable panel is perfect for residential and commercial applications, providing reliable power output in various conditions.

How long does a 500W photovoltaic panel last?

Thanks to its exceptional power in comparison to standard versions, this 500W photovoltaic panel from AE Solar comes with a performance guarantee of 30 years of 80% guarantee! Meaning after 30 years, you can be sure that your system will still be generating about 80% of its power.

What are high-efficiency mono-crystalline cells made of?

All high-efficiency mono-crystalline cells are made of gallium-doped silicon wafers, which have better anti-degradation performance and ensure durable and stable high-efficiency power generation. The first year degradation is within 2%. 3. Multi-busbar cell technology
