

550v high frequency inverter

Overview

What is hv550 series frequency inverter?

HV550 series frequency inverter is high performance inverter for global application with wide voltage input. HV550 series frequency inverter is high performance inverter for global application with wide voltage input. It can support 220V single phase, 220V 3 phase, 380V 3 phase and 460V 3 phase input voltage.

What is pi550 series inverter?

PI550 series inverter is a high-performance current vector inverter developed by Powtran technology based on PI500 series. The product adopts DSP as the core control unit, unique vector control algorithm, and true current vector control that strengthen produc.

What is i550 cabinet frequency inverter?

The i550 cabinet frequency inverter is a compact control cabinet device with scalable functionality. It is versatile, reliable, and easy to use. The requirements of the Ecodesign Directive, Standard EN 50598-2, are met. Application areas: Conveyor drives, traveling drives, winding drives, hoist drives, extruders, packaging machines, pumps, fans, .

What type of input voltage can hv550 support?

It can support 220V single phase, 220V 3 phase, 380V 3 phase and 460V 3 phase input voltage. Using advanced current vector control algorithm and better hardware platform HV550 can be widely used in plenty of applications with V/f control, sensorless vector control and close-loop vector control (with PG card).

What is the i550 MoTeC decentralized VFD for wall and motor mounting?

The i550 motec decentralized VFD for wall and motor mounting offers high-performance and reliability with NEMA 4X indoor protection for your rapidly

moving automation environment. The drive can be extended for universal use with an extension box and disconnect switch.

550v high frequency inverter

[55 kW Frequency Inverter, 3 Phase 240V, 380V, 480V](#)

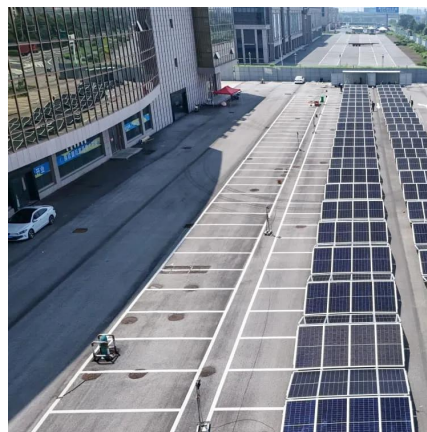

55 kW 3 phase inverter 240V, 380V, 480V with high frequency resolution, analog setting: 0.1% of max frequency; digital setting: 0.01Hz. Come with V/F control ...
