

6-cell lithium battery pack

Overview

What is a lithium-ion battery pack?

The Lithium-Ion battery packs at La-Z-Boy have multiple functionalities. Here are some of them in a nutshell. Works with all La-Z-Boy power recliners, sofas, and sectionals (excluding lift chairs). Red flashing light while charging, green steady light when fully charged (approx. 5-7 hours charge time).

What is a 6S LiPo battery?

A 6S LiPo battery replaces the liquid electrolyte with a polymer electrolyte. As a result, the battery has more flexibility. The need for 6S lipo batteries is increasing with time. This is due to its high power supply. So, in this article, we'll shed light on the best 6s lipo batteries and their specifications. Part 1.

What is the capacity of 18650 6s LiPo battery?

22.2 V 2600mah 18650 Battery Pack 18650-6S ensures secure power delivery. It has a capacity of 2600mAh. Thus, 6S LiPo batteries are a great option for casual and competitive use. Specifications: Features: 2600mAh battery for longer flight times. Built with high-quality lithium polymer cells for long-lasting performance.

How many cells are in a LiPo battery?

In the case of a LiPo battery, the number of cells in the battery pack determines its total voltage. Each cell in the battery is connected in series, and all of them have a safe operating voltage ranging between 3V to 4.2V. For instance, if your LiPo battery has a 6S marking, it implies it's composed of 6 cells connected in series.

What is the safe operating voltage for a 6S LiPo battery?

For instance, if your LiPo battery has a 6S marking, it implies it's composed of 6 cells connected in series. Thus, the safe operating voltage range for your 6S LiPo battery will range between 18V ($=6 \times 3V$) and 25.2V ($=6 \times 4.2V$). As an RC

device enthusiast, you will want the best performance for your device.

Are 6S LiPo batteries better than nickel batteries?

The 6s LiPo batteries are better than their Nickel electrode-powered counterparts because they implement Lithium-ion technology. However, instead of a liquid electrolyte, they use a polymer one. This allows your LiPo batteries to power your devices better without weighing them down.
