

Overview

A 80kW Solar Kit requires up to 5,700 square feet of space. 80kW or 80 kilowatts is 80,000 watts of DC direct current power. This could produce an estimated 9,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

80 kilowatts of solar photovoltaic

80kw solar panel system for sale

A 80 kW solar system ensures a steady energy supply for your enterprise and decreases or nullifies your electricity bills. We offer complete solar kits and our engineers ...
