

800W inverter connected to battery

Overview

An 800 watt inverter can run a battery charger that requires less than 800 watts. Connect the inverter directly to a battery for best performance. Watch for efficiency loss and check the battery charger's peak power requirement. This helps prevent overload on the inverter or generator.

800W inverter connected to battery

Inverter VE.Direct

Inverters allow you to power domestic equipment - requiring 230V/120V AC - using 'leisure' or 'automotive' batteries rated at 12V, 24V or 48V DC.
