

# **ASEAN energy storage pack battery**

## Overview

---

Does ASEAN have a policy for promoting battery energy storage?

According to the ASEAN Centre for Energy (ACE) Policy Brief: Enabling Policies for Promoting Battery Energy Storage in ASEAN, only a few AMS have related policies. For instance, Thailand's Ministry of Energy presented its 'Energy 4.0' strategy by integrating disruptive energy technologies such as energy storage systems.

Does Singapore have a battery energy storage system?

Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space. Earlier this year, the city-state launched the region's largest battery energy storage system (BESS).

Does ASEAN need energy storage?

The ASEAN bloc has set the targets of 23% renewable energy in its Total Primary Energy Supply (TPES) and 35% renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. Additionally, without BESS acceptance on a larger level, the needed funds won't materialise, and fewer BESS will be built.

What is ASEAN battery technology conference?

About ASEAN Battery Technology Conference ASEAN Battery Technology Conference (ABTC) stands out as the premier battery conference in ASEAN, attracting an audience of over 250 participants. We look forward to engaging with a diverse range of participants, including cell manufacturers, pack integrators, and recycling companies.

What is a battery energy storage system?

A battery energy storage system is a power station that uses batteries to store excess energy. A BESS is a potential unsung hero in the world's efforts to pivot to more renewable energy sources in the power sector.

Why is ASEAN falling behind in technology implementation?

However, the Association of Southeast Asian Nations (ASEAN) bloc is falling behind in technology implementation due to a lack of awareness and policy initiatives. Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space.
