

Albania Solar Luminous System

Overview

How many solar projects are in Albania?

The Albanian government has received requests from four companies looking to develop four separate solar projects located across the country. Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a cumulative capacity totaling 235 MW.

How much does solar cost in Albania?

Albania ran a 300 MW solar tender last year. The Ministry of Infrastructure and Energy shortlisted nine bidders with an average price of €0.0513 (\$0.054)/kWh offered across 283.9 MW of capacity allocated in July. The country had deployed 163 MW of solar by the end of 2023, according to figures from the International Renewable Energy Agency (IRENA).

Will Albania build a solar photovoltaic park?

The Albanian government has given the green light to two projects put forward by local companies and envisaging the construction of solar photovoltaic (PV) parks with a combined capacity exceeding 100 MW. The Karavasta solar park in Albania. Image by: Voltalia.

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Can Albania grow in solar energy?

Albania's potential for growth in solar energy is underscored by its renewable energy auction program, which has already begun to attract interest from

both local and foreign firms.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.
