

Angola communication base station grid-connected photovoltaic power generation outdoor unit

Overview

How many solar power plants are there in Angola?

The first two Angolan solar power plants are under construction in the municipality of Biópio and Baía Farta, Benguela province. The project totals more than 500,000 solar panels and the solar energy production has a capacity of 285MW. In 2023, the construction of one more solar power plant was launched in Namibe province.

Why is the Angolan government supporting solar power projects?

The Angolan government is supporting the development of several new solar power projects, in an effort to accelerate the country's energy transition and reduce reliance on diesel- and coal-fired power generation.

What are the major photovoltaic projects in Angola?

The Quilemba Solar Power Park is another major photovoltaic project underway in Angola, backed by PPP among France's Total Eren (51%), Angola's Sonangol (30%) and local renewable developer Greentech (19%). Located in Lubango, the capital of Angola's Huíla Province, commercial operations of the 35 MW solar plant are expected by the end of 2023.

How can Angola increase its power generation capacity?

Angola is working hard to increase its power generation capacity by boosting hydro and solar energy, as well as linking and expanding its electric grids. This will create more sustainable income sources, promote the global energy transition, increase the country's exports and modernise the economic possibilities of its citizens.

Are off-grid solar systems boosting rural electrification in Angola?

Off-Grid Solar Systems to Boost Rural Electrification A number of off-grid solar systems are being put in place throughout Angola's provinces, particularly those in rural areas that can most benefit from decentralized energy solutions.

Could Angola become Africa's largest producer of solar energy?

The Ministry of Energy and Water's recent mapping studies reveal that the country could harness 16.3 GW of solar power and 3.9 GW of wind power. Angola has the potential to become sub-Saharan Africa's largest producer of solar energy.
