

Antimony energy storage battery cost price

Overview

How much does antimony cost in 2024?

The price of antimony closed 2024 just under \$40,000/tonne leaving battery manufacturers wondering how much further the price of the metal will go in the year ahead. Antimony is a key alloy component in stationary lead batteries. The price of antimony has risen by 250% since the start of the year.

How much does antimony cost in USA?

From global manufacturers to government agencies, our clients rely on us for accurate pricing, deep market intelligence, and forward-looking insights. The Antimony Prices reached 34500 USD per MT in USA March 2025. Explore real-time antimony price fluctuations, price chart, trend and market analysis.

How will antimony prices affect the energy industry?

The surge in antimony prices has significant implications for various industries. Manufacturers of lead-acid batteries, solar panels, and flame-retardant materials are facing higher production costs. This could lead to increased prices for end consumers and potentially slow down the adoption of renewable energy technologies.

How much is a metric ton of antimony worth?

In May, prices reached US\$17,588.88 per metric ton of antimony ingot, up 54% in 2024, according to the Shanghai Metals Exchange; prices in Europe reached US\$22,700 a ton on June 14, up more than 75% on 2023. And now China has announced it will impose export limits on antimony because of "national security.".

Should smelters pay for antimony?

"On the upside for smelters, they are only paying for the antimony in scrap at the price of lead, but charging for it in finished alloys at elevated levels, if not right up to the price of new antimony. So maybe they should dry their tears

just a little." China produces around 48% of the world's antimony.

Is a supply shortage causing a rise in antimony prices?

Stay Ahead. Investment market and industry insights delivered to you in realtime. A supply shortage has triggered the steepest rally in price "ever recorded" in the global antimony market since April, according to FastMarkets who began recording prices from January 1980.
