

Argentina energy storage project usage classification

Overview

Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

What is Argentina's energy sector regulatory framework?

Argentina's energy sector regulatory framework aims to provide more market certainty and attract foreign investment to enhance oil and natural gas production for exports. Given the current economic challenges, Argentina's federal and provincial governments continue to have a significant role in the energy sector.

What role does Argentina play in the energy sector?

Given the current economic challenges, Argentina's federal and provincial governments continue to have a significant role in the energy sector. The Argentine government views the oil and natural gas sector as a major driver of

exports and a way to generate revenue.

Are there liquefied natural gas regasification facilities in Argentina?

There have been two liquefied natural gas (LNG) regasification facilities in Argentina, including in Bahia Blanca and Escobar in recent years.

Regasification is the process of converting liquefied natural gas (LNG) back into a gaseous state.
