

Armenia Telecom has many photovoltaic sites

Overview

What is Armenia's largest solar power plant?

The 200-megawatt plant named AYG-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

How does Armenia support the solar energy industry?

The Armenian government has a goal to support the solar energy industry through different programs which include offering citizens subsidized loans, to rebuild their apartments and private houses. Armenia ensures a free and competitive market environment to encourage innovative ideas and drive the growth of the industry.

What is Armenia's energy mix?

According to the International Energy Agency, in 2019 renewables represented 8.8% of Armenia's energy mix. Around 32% of the electricity generation came from renewable resources including hydro. Armenia manages to cover 24% of energy demand with domestic production, which comes mostly from nuclear and hydro energy.
