

Australian energy storage container house manufacturer

Overview

How much does a container home cost in Australia?

The costs of custom container homes will vary depending on size, design, and structure. In Australia, container homes can cost as little as \$1,200 per square metre – roughly a 40% drop in construction costs. Generally, sea container homes can range anywhere from \$15,000 for a basic unit to \$50,000 for a small but fully-outfitted two-bedroom.

What is a luxury shipping container home?

The clean lines of luxury shipping container homes recall simplicity and modernity. It is an aesthetic that lies at the confluence of past and future, moderation and resurgence. The dweller stands in the midst of it, guided by a vision of more sustainable way of living.

What is a coast to Coast container home?

Every Coast to Coast container home is engineered with a steel frame and manufactured to meet or exceed Australian Standards. We proudly back that with a 20-Year Structural Warranty — offering double the coverage of most container homes on the market.

What is a shipping container solar solution?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

How do shipping container homes work?

During this process, the shipping container gets refitted for use as a modular unit. The container home will then be transported to the site, usually via hydraulic lift. It is then placed onto the foundation and connected with services. Are shipping container homes cheaper?
