

# **Australian energy storage systems for sale**

## Overview

---

Which battery energy storage systems are suitable for Australia's harshest conditions?

Our smartly designed, IP-rated battery energy storage systems (BESS) are adaptable, easy to transport and install, and suitable for Australia's harshest conditions. Designed to the highest standards, our units can be sized from 1MW to 200MW ensuring flexibility, modularity and redundancy at 11/22/33KV output voltages.

Why do Australians need solar battery storage?

As more Australians embrace solar energy, battery storage solutions have become essential for maximising its benefits. With the right solar battery storage system options, homeowners can store excess energy, reduce reliance on the grid, and enhance energy independence.

What is a battery energy storage system?

Lithium-ion batteries are used to store electrical energy and can be recharged, while battery energy storage systems use a combination of technologies to store potential energy and provide a reliable source of electricity. A storage system incorporates the battery along with inverter/chargers for the control of the battery energy storage system.

Should you invest in a battery storage system in Australia?

With Australia's abundant sunlight and rising electricity prices, investing in a quality battery storage system is smart for those seeking to save on energy costs and contribute to a sustainable future. Let's dive into the top contenders in the market.

What are the different types of battery energy storage systems?

There are seven major types of battery energy storage systems including Lithium Titanate, Lithium-ion, Lead-acid, Gel, Redox flow, Sodium Sulphur and

Zinc bromine flow. Battery energy storage systems work by converting the excess AC power from your solar into DC battery storage.

Who is apex Energy Australia?

At Apex Energy Australia, we offer state-of-the-art Battery Energy Storage Systems (BESS) tailored to meet diverse energy needs.
