

Base station 48V rectifier power module

Overview

What is the Eaton apr48-3g power rectifier?

Eaton DC Power Solutions APR48-3G Rectifier Module The Eaton® APR48-3G Power Rectifier is designed specifically for network access applications such as cellular base stations, customer premises equipment and road-side cabinet installations.

What is a rectifier module?

These versatile Rectifier Modules function as either power supplies or battery chargers for 12, 24 or 48 volt systems; positive, negative or floating ground. They may be employed singly or in combination, enabling the installer to scale the system anywhere from 500 to 10,000 watts per rack.

What is a rectifier system?

A Rectifier system converts alternating current (AC) to direct current (DC) and provides the power necessary to charge batteries. With a focus on continuously improving the total cost of ownership, Best Plus Power's rectifiers, combined with advanced control and monitoring features, help to reduce both capital and operational expenditure.

What is r4875g1 rectifier module?

The R4875G1 Rectifier Module is a digital rectifier with high efficiency and high power density. It supports a wide input voltage range and provides 53.5v DC default output voltage. R4875G1 Rectifier Module provides comprehensive protection functions and supports soft start with low noise. Multiple rectifiers can be connected in parallel.

What is embedded communication power supply system (rectifier system)?

The embedded communication power supply system (Rectifier System) is suitable for small program-controlled switches, access networks, transmission equipment, mobile communications, satellite communications ground stations,

microwave communications power supply, and can also be used for power supply for other communications equipment.

What is the power factor of a rectifier system?

technology, and the power factor value reaches 0.99. A Rectifier system converts alternating current (AC) to direct current (DC) and provides the power necessary to charge batteries.

Base station 48V rectifier power module

24V and 48V rectifiers

Eaton's rectifiers are designed to power a wide range of applications including telecom access networks, roadside cabinets, customer premises equipment, cellular base ...
