

Benin has solar power generation for home use

Overview

Benin has officially launched the “Benin Off-Grid Solar Access Project,” a €45 million initiative funded by the World Bank. This project aims to bring electricity to 50,000 rural households, expanding access to affordable and sustainable energy in remote areas. Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

Will Benin provide 100% electricity to its community by 2050?

Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3. This shows that the government must make more effort to provide 100% electricity access to its community by 2050 . Electricity mix of Benin from 2016 to 2020 .

How can Benin increase local production?

However, the government of Benin is making serious efforts to increase local

production through national projects, specifically the Solar Energy Promotion Project (PROVES) and the Renewable Energy Development Program (PRODERE) . The principal RE sources in Benin are hydro energy, biomass energy, wind energy and solar energy.

Does Benin have a green energy policy?

To provide clean energy at a lower cost to their citizens, all nations of the world are striving to increase their energy production in an environmentally friendly way. Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years.
