

Bhutan Industrial Energy Storage Project Investment

Overview

What is Bhutan's integrated energy strategy?

The objectives driving this integrated strategy are clear: Guarantee long-term energy security; fuel sustainable socio-economic growth; enhance resilience against climate change; ensure continued access to reliable and competitive energy; and position Bhutan in the forefront of clean energy development.

What are the policies governing the energy sector in Bhutan?

1.8 The energy sector was governed by several policies, such as the Bhutan Sustainable Hydropower Development Policy-2021, Alternative Renewable Energy Policy-2013, Domestic Electricity Tariff Policy-2016 and National Energy Eficiency & Conservation Policy-2019.

Will Bhutan add 5000 MW of hydropower by 2040?

He underlined Bhutan's target of adding 15,000 MW of hydropower and 5,000 MW of solar capacity by 2040, positioning clean energy at the core of its economic growth. The Wangchhu project is the first to be executed under a broader agreement signed in May 2025 between Adani Group and DGPC to jointly develop 5,000 MW of hydropower in Bhutan.

Does Bhutan need long-term energy security?

With growing demand, where the peak power demand has outpaced firm power supply by 125% in 2024 which is expected to increase further, securing the country's long-term energy security has become ever more a priority. For Bhutan, long-term energy security means meeting winter demands when our hydropower generation ebbs to the lowest.

What is Bhutan's hydropower potential?

1.3 Bhutan is endowed with huge hydropower potential together with solar, wind and biomass resources. The techno-economically viable hydropower potential is 33,000 MW from 90 sites as per the Power System Master Plan

2040 (PSMP), where these sites are mostly located outside of the ecological parks and the biological corridors.

What are the requirements for land acquisition & leasing in Bhutan?

The land acquisition and leasing shall be carried out in accordance with the Land Act of Bhutan 2007 and its regulations and guidelines, as may be amended from time to time. 8.2 In case of the private land required for Renewable Energy project, the DoE will facilitate its acquisition and conversion to SRF.
