

# **Bhutan Photovoltaic Energy Storage**

### **Overview**

Is solar energy a viable alternative to hydropower in Bhutan?

One of the renewable sources of energy that could prove to be a boon to far flung parts of Bhutan as well as viable alternative to hydropower energy is solar energy by which, after much deliberation in the national assembly, its potential has been acknowledged by reduction and doing away with taxes for procuring solar based equipment.

Will Bhutan run into energy deficit if it doesn't use solar energy?

Bhutan is likely to run into energy deficit if it doesn't tap into alternative renewable energies like solar energy. The solar energy generation in Bhutan is still in its infancy and if Bhutan could fully utilize that, it could provide considerable source of revenue.

What is Bhutan's first solar power project?

The first phase of Bhutan's first utility-scale solar power project at Sephu in Wangdue Phodrang is set for completion by March next year. A utility-scale solar facility generates solar power and feeds it into the grid. The 17.38-megawatt solar farm is expected to generate around 24 million units of energy annually, once operational.
