

Bidirectional inverter 3 6kw

Overview

What is a bidirectional solar inverter?

A bidirectional solar inverter can additionally convert AC power to DC power for battery charging (if required). The inverter automatically detects availability of AC supply and changes operation mode from inverter to charger and charges the battery if solar power is not available.

What is the array size range for the 3.6kW inverter?

For this model, the array size ranges between 1.2kW to 4.6kW. The 3.6kW inverter with the 4.68kW MPPT is perfect for the SA market. Now you can have enough solar power to charge your batteries and provide the load the whole day.

Where can I buy a sunsynk 3.6 kW / 7 kW inverter?

Call 0151 832 4300 and ask for TOM +44 (0)7707237414 for more information on this amazing machine. #Sunsynk 3.6 kW/ 7KW #Bi-Directional inverter #Super Inverter. 1- One button programming to configure your Inverter.

What is the array size range for the Sunsynk 3.6kW hybrid inverter?

The Sunsynk 3.6kW hybrid inverter is ideal for small-scale AC applications. For this model, the array size ranges between 1.2kW to 4.6kW and it has several software features common with our larger models.
