

Bosnia and Herzegovina BIPV photovoltaic roof integrated panel cost

Overview

What is building integrated photovoltaics (BIPV)?

Building Integrated Photovoltaics (BIPV) is a technology that provides buildings with the ability to generate solar power without disrupting the aesthetic of the architectural design. The technology integrates photovoltaic (PV) modules into the skin of a building, replacing the façade and pitched/flat/curved roofs.

How much does a BIPV cost?

Two important BIPV accessories are solar shadings and solar balconies, which can replace regular balconies and the roof for them. The BIPV balcony costs around 520€/m2, and the solar shading rounds up the 800€/m2.

Who is building a 125 MW solar plant in Bosnia & Herzegovina?

Bosnia and Herzegovina has started working on a 125 MW solar plant – its largest to date. China's Norinco International will build the facility, with completion expected in one year. The European Commission has published a call for private companies to invest in the Western Balkans.

What is a BIPV solar system?

Building Integrated System: BiPV Solar Panels forms the roof structure itself, therefore lesser materials required to be transported to site. The gap between panels and roof is also eliminated, preventing the Nested overlapping design, similar to conventional metal deck roofing construction is incorporated.

What is a BIPV roof?

is a 2-in-1 technology which combine Panel + Metal Roof Building Material) together and mounted on building purlins part of the building itself. BiPV due to its building materials nature, mount tightly to purlins as part of the building, it can cover the full roof space, therefore roof space utilization rate can be often >90% (+20% higher).

How much does a BIPV solar module cost?

The average price for an European BIPV glass glass module rounds about 120-250€/m2, whereas the minimum price for standard European glass-glass module can be as low as 95€/m2. But if you are looking for a one-of-a-kind result for solar exterior customization, the price can go up to as much as 380€/m2.
