

Bosnia and Herzegovina recently held an energy storage project

Overview

The construction of this largest post-war investment in BiH's energy sector has been delayed and is still on hold. It remains unclear when or if the project will be restarted.

Electric power generation is a key sector of economic activity in BiH. Electric power is primarily generated in coal-fired thermal and large-scale hydro power.

BiH's electrical grid has suffered from decades of neglected maintenance and a lack of investment. The European Bank for Reconstruction and Development.

Why should Bosnia and Herzegovina invest in an integrated strategy?

An integrated strategy will provide investors with certainty and predictability, leading to a diversified economy and sustainable jobs creation. "The forthcoming National Climate and Energy Plan will put Bosnia and Herzegovina on the right path to ensure the energy security while improving its long-term resilience to climate change.

Which is the largest solar power plant in Bosnia & Herzegovina?

20 May 2025 - Aurora Solar started building a 125 MW solar power plant near Stolac. It is set to become the largest in Bosnia and Herzegovina. 15 May 2025 - The State Electricity Regulatory Commission is drafting a decision on BESS, Mirza Kušljagić said at Belgrade Energy Forum 2025.

What does the renewables readiness assessment mean for Bosnia & Herzegovina?

"The Renewables Readiness Assessment represents an important step in the process of gradual transition from fossil fuels to renewable energy sources on the way to the decarbonisation of Bosnia and Herzegovina's energy sector by 2050, for which we are grateful to IRENA.

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.

Does Bosnia & Herzegovina use fossil gas?

Bosnia and Herzegovina does not have its own fossil gas extraction and has a very low level of gas dependence – less than 3 per cent of total energy supply in 2022. In the Federation of BiH entity, it is mostly used for heating in Sarajevo.

Should Bosnia & Herzegovina cap energy consumption?

To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 6.5 Mtoe and final energy consumption at 4.34 Mtoe by 2030. In mid-2023 Bosnia and Herzegovina published a draft National Energy and Climate Plan.
