

# **Box-type energy storage system**

## Overview

---

What is a modular energy storage system?

The Modular Energy Storage System is a modern approach to managing energy. BYD, based in Shenzhen, China, uses advanced technologies to provide efficient energy storage solutions, promoting energy independence.

What is BYD energy storage?

BYD, based in Shenzhen, China, uses advanced technologies to provide efficient energy storage solutions, promoting energy independence. Featuring a flexible battery structure, this system allows easy scaling to meet varying energy requirements for residential, commercial, and off-grid scenarios.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.

Why should you choose BYD battery-box premium HVS?

Efficiency, reliability, and scalability are fundamental attributes of the BYD Battery-Box Premium HVS, making it a preferred solution for energy storage across various settings. This modular battery system maximizes energy throughput while ensuring consistent performance for users who need dependable energy sources.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C

delta between cells.

Why should you choose a BYD battery-box?

The modular design of the BYD Battery-Box allows flexibility in capacity, enabling users to customize their energy storage solutions according to specific requirements. This adaptability makes it an optimal choice for both residential and commercial applications.
