Overview

How can Brunei decarbonise the energy sector?

New techniques and technologies will be needed to decarbonise these areas. In 2014, Brunei adopted a strategic plan to achieve 10% share of renewables in the national energy mix by 2035. The plan provides the outline to introduce renewable energy policy and regulatory frameworks and to scale-up market deployment of solar PV.

What is the future of oil and gas industry in Brunei?

Current and Future Skills in the Oil and Gas Industry: Towards the Expansion of Brunei Downstream Energy Sector. The Ministry of Energy Holds Dialogue Session (Sesi Muzakarah) with Members of the Legislative Council. The Brunei Darussalam National Climate Change Policy shall adopt ten key strategies with 2035 as a general target year.

How did BSP achieve its first power plant in Brunei?

The project was achieved by BSP's almost entirely Bruneian team in partnership with international experts. The 3.3 MWp (Megawatts-peak) plant produced its first power on 30th March 2021.

What is Brunei Darussalam's climate strategy?

This strategy seeks to strengthen Brunei Darussalam's resilience against climate change risks and increase its capacity to adapt to the impacts of the changing climate. Brunei Darussalam is prone to four key risks including; flood, forest fires, strong wind and land slides. Mandatory monthly and annual reporting of carbon inventory.

What is bdnccp in Brunei Darussalam?

Other than that, their programmes on climate action are mostly arranged on the Brunei Darussalam National Climate Change Policy (BDNCCP), outlining strategies, action plans, performance indicator (KPI), milestones and their

appropriate monitoring mechanisms for climate mitigation and adaptation.
