

Burkina Faso communication base station mixed energy prices

Overview

What is the electricity price in Burkina Faso?

The residential electricity price in Burkina Faso is XOF 123.450 per kWh or USD 0.218. The electricity price for businesses is XOF 131.000 kWh or USD 0.232. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Burkina Faso with 150 other countries.

Is biomass a source of electricity in Burkina Faso?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Burkina Faso: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

How is energy used in Burkina Faso?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What are the different types of energy transformation in Burkina Faso?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Burkina Faso for 2022. Another important form of transformation is the generation of electricity.

What is happening in Burkina Faso in 2022?

No data for Burkina Faso for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions – during which up to

half of their energy content is lost.

How has Burkina Faso changed over the years?

Burkina Faso has made remarkable progress in recent years, with an increase in installed capacity from 324.6 megawatts (MW) in 2017 to 410 megawatts in 2019. The share of renewable energy also surged from 9.4% in 2015 to 18.36% in 2019.
