

Cameroon solar energy storage battery exports

Overview

Currently, 80% of Cameroon's spent batteries get exported to Europe. But with new EU regulations requiring on-site processing by 2025, local facilities must scale fast. The silver lining?

Domestic processing could create 12,000 jobs by 2027 according to Ministry projections. Does Scatec have a solar power plant in Cameroon?

10 June 2024, Cameroon/Norway: Release by Scatec has entered into two new lease agreements with the national electricity company ENEO in Cameroon, expanding its existing solar and battery storage power plants in the country to 64.4 MW of solar and 38.2 MWh of batteries.

How much energy will release supply in Cameroon?

When the extensions of the projects are completed, Release's projects in totality will supply energy to about 200,000 households in Cameroon, according to ENEO estimates, generating an annual production of about 141.5 GWh of electricity.

How to increase solar energy in Cameroon?

In order to enhance solar energy in Cameroon, the government recently signed an agreement with China to carry out feasibility studies aiming at installing several light points in Yaoundé . Recently, Cameroon obtained eKiss (energy-keep it simple and safe) mobile off-grid photovoltaic systems from Antaris Solar .

How is electricity distributed in Cameroon?

Despite the huge hydroelectric power schemes, electricity in Cameroon is not evenly distributed, with only 20% of the population having access to the national grid . The majority of the population connected to the electrical grid is the urban dwellers while there is little development regarding rural electrification schemes.

What is the main energy source used in Cameroon?

The main energy source used in Cameroon is still biomass. For cooking and heating purposes, the majority of Cameroonians still rely on biomass, which is abundant and to certain extends renewable and affordable. Electricity and gas are still very lowly used, mostly because of non-availability and non-accessibility, especially in the rural areas.

Does Cameroon have solar energy?

During the last few years, several studies have consistently established that the entire territorial distribution of Cameroon is endowed with a great potential of solar energy, noticeably with about 900 trillion kWh of solar energy reaching its land per annum .
