

Can outdoor power supplies be checked in

Overview

Is it safe to use electrical equipment outside?

When using electrical equipment or working near power lines outdoors, weather conditions and the presence of utility equipment present safety risks that are not typically found indoors. Therefore, it's important to operate equipment properly and be aware of potential hazards around you.

How do I use a power tool outside?

Follow these guidelines before, during and after operating a power tool outdoors: Read the tool's instructions, especially all safety warnings, before use. Plug the cord into a three-prong outlet on a three-conductor circuit. This provides the added safety of the neutral-to-ground connection provided by the third wire.

What is an external power supply?

Sign up for email updates on regulations for this and other products As defined in the Code of Federal Regulations (CFR), "external power supply" means an external power supply circuit that is used to convert household electric current into DC current or lower-voltage AC current to operate a consumer product.

How can I protect my home from electric shock?

Prevent the risk of electric shock by keeping the following in mind when playing or working outdoors near power lines: Install your satellite dish as far from electric lines as possible, preferably at the opposite end of the house. Never let children fly kites, motorized airplanes or drones near power lines.

What is the external power supplies test procedure rulemaking docket eere-2014-bt-tp-0043?

The external power supplies test procedure rulemaking docket EERE-2014-BT-TP-0043 contains all notices, public comments, public meeting transcripts, and

supporting documents pertaining to this rulemaking. There is no public meeting scheduled at this time. The comment period is closed.

How do you maintain a power tool?

Inspect the tool after each use, and keep it in good working order. Replace or repair worn or defective equipment immediately. Keep the tool clean and store it in a dry place. Never use a power tool around flammable liquids such as gasoline or solvents. Keep the work area clean of sawdust, shavings or anything else that could pose a fire hazard.
