

Can outdoor power supply be used in shopping malls

Overview

Why do shopping malls need backup power generators?

Without electricity, retailers cannot trade. So, the overarching reason shopping malls need backup power generators is to provide tenants with a reliable source of electricity. With unplanned power outages and load shedding still impacting retail outlets across South Africa, having a backup power generator means business continuity; come what may.

Should a mall shut its doors during a power outage?

Whether a mall has to shut its doors during a power outage or not, being able to communicate with customers is pretty important. Backup power means a mall can communicate to customers that they are open and operational during outages. Air conditioning is such a relief for shoppers when visiting their favourite malls.

Does your shopping centre need a backup power generator?

Let's face it: having a backup power generator is a competitive advantage for any shopping centre. If it's a choice between shopping at their favourite mall without power, or a competitor mall with backup generators, chances are a customer is going to go with option two.

Why do shopping malls need air conditioning?

Air conditioning is such a relief for shoppers when visiting their favourite malls. When the power goes out, these aircons can't keep cooling stores and common areas down. With backup power generation in place, shopping malls can keep offering a comfortable environment for both shoppers and shop staff.

Why do malls need backup power?

Backup power means a mall can communicate to customers that they are open and operational during outages. Air conditioning is such a relief for

shoppers when visiting their favourite malls. When the power goes out, these aircons can't keep cooling stores and common areas down.

What happens if power goes off at a mall?

Lighting, elevators, access control, and other mall infrastructure go down when the power cuts off. This means it becomes impossible for shoppers to navigate the centre, unless there's a backup power generator keeping this infrastructure working and the mall open to the public.

Can outdoor power supply be used in shopping malls

Malls & Facilities
