

Central African Republic all-round solar container

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What makes our containerised solar power generation units special?

“What makes our containerised solar power generation units special,” says Tobias, “is our use of international lquality engineering and components, while still producing local content that allows us to offer a price advantage and local support. We pride ourselves that our energy solutions are made in Africa for Africa.”.

What is sustainsolar – a containerised solar power solution?

Sustainable Power Generation (Pty) Ltd recently introduced its new containerised solar power solution – SustainSolar – for the African market. The South African-based clean Developing economies face numerous challenges regarding reliable electricity supply, especially in rural areas, which require unique, inventive responses.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the

Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?
