

China Power Construction Energy Storage Cabinet

Overview

Will China double its energy storage capacity by 2027?

Our Standards: The Thomson Reuters Trust Principles. China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan announced by authorities on Friday.

How big is China's energy storage capacity?

Sign up [here](#). Current installed new energy storage capacity, which is made up mostly of lithium-ion battery storage, was 95 GW as of June, the regulator, the National Energy Administration, said in August. China has raced ahead of its energy storage targets in the past.

What are the leading energy storage battery companies in China?

Leading energy storage battery companies in China include BYD (002594.SZ), which is also the country's biggest electric vehicle maker, and CATL (300750.SZ).
