

Commercialization of vanadium flow batteries

Overview

In a recent presentation at the Electrochemical Society symposium, insights from a decade of vanadium flow battery development were shared, emphasizing the importance of testing at various scales, addressing safety and reliability issues early, and the challenges faced with the commercialization of mixed-acid electrolytes, particularly concerning chlorine gas generation during deployments.

Commercialization of vanadium flow batteries

ICS Website

Vanadium Redox Flow Battery (VRFB) VRFB is a rechargeable battery that is charged and discharged by means of the oxidation-reduction reaction of vanadium ions. Sumitomo Electric ...
