

Communication Base Station EMS Environmental Protection

Overview

Can 5G application base stations avoid pollution before treatment?

To understand the current situation of the electromagnetic radiation environment of 5G application base stations is the basis for avoiding the old road of "pollution before treatment" in environmental management and solving the problem of neighbourhood avoidance.

Do 5G application base stations meet the electromagnetic radiation environment control limits?

According to the analysis of the monitoring data, the electromagnetic radiation environment levels of 5G application base stations at various monitoring points in urban areas all meet the requirements of the Electromagnetic Environment Control Limits (GB8702-2014).

Can a broadband sounder evaluate human exposure to EMF?

An example of estimation of uncertainty in the process of evaluating human exposure to EMF using a broadband sounder is presented in . However, this research was made before the 5G deployment, and most of the specific characteristics of 5G New Radio schemes are not still considered. 5.2. Broadband field meter results.

Can broadband equipment be used to measure EMF field level?

Thus, broadband equipment can still be used for assessing the EMF field level when measurements are done by forcing an extra load of the station, as it uses to overestimate the field levels. The largest differences in the values measured by the different methods happen at location 7, and especially at location 4.

Does 5G signal exposure affect base station compliance?

This agrees with measurements done in other countries whose authors conclude that the exposure to 5G signals is limited , , , but this does not

assure the base station compliance as full load situation should be considered for such assessment. It also shows that the increase in the EMF field is due to the induced data traffic.

Can broadband field probes assess 5G base stations compliance?

This paper analyzes the feasibility of assessing the 5G base stations compliance using broadband field probes and compares their performance with alternative methodologies and equipment.

Communication Base Station EMS Environmental Protection

<u>5G Mobile Communication Base Station</u> <u>Electromagnetic ...</u>

Based on the above background, in order to solve the contradiction between the rapid construction of communication BS and the management of EMR environmental impact ...
