

Container building power generation

Overview

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, our genset containers offer optimal performance in various site conditions.

The overall package (gas engine, container, and auxiliary components) is designed to meet 65 dB(A) in 10m (surface sound pressure level according to DIN 45635). Lower sound pressure levels are available on request.

A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat.

The standard ventilation is designed for ambient temperatures from -25°C to +34°C. All genset containers are also available with an option for -40°C and most variants can be.

A containerized genset is a diesel or gas-powered generator that is housed within a specially designed ISO shipping container. This format offers a portable, weatherproof, and secure power generation unit that is ideal for a wide range of industrial, commercial, and emergency backup applications.
