

Containerless solar energy manufacturer

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is a high-efficiency solar energy storage system?

A high-efficiency solar energy storage system successfully deployed, providing stable and clean electricity to remote homes and schools, improving daily life. Blue Carbon collaborates with leading global companies to ensure superior product quality and cutting-edge technology, delivering efficient and reliable energy solutions to customers.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Who is solarcont GmbH?

SolarCont GmbH was created through a cooperation between the two successful companies Hilber Solar GmbH from beautiful Tyrol and the company Gföllner Fahrzeugbau und Containertechnik GmbH, which is deeply rooted in Upper Austria. This cooperation makes it possible to develop a completely new type of mobile solar system.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the

Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?

.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.
