

Croatian photovoltaic wind power and energy storage company

Overview

With an ambitious roadmap, RES Croatia has been a key player in promoting renewables in Croatia since 2016, representing a range of technologies from solar and wind to biomass and energy storage. How much solar power does Croatia have?

Solar is leading the new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power. Croatia has now reached 700 MW, out of which 600 MW is on the roofs of firms and homes, Milatić said.

Could solar energy be a key to Croatia's energy future?

“Croatia has vast untapped solar potential. By modernising grid infrastructure, supporting energy storage solutions and remove barriers such as the high grid connection costs, we can bring solar energy to the forefront of Croatia’s energy future.”.

Why is Solarpower Europe partnering with Res Croatia?

SolarPower Europe’s partnership with RES Croatia underscores our dedication to supporting Croatia and its neighbours overcome barriers to renewable energy growth, including high grid connection costs and the need for an updated grid infrastructure to support solar projects.

Is Norway's Statkraft a potential energy producer in Croatia?

It is otherwise Europe’s largest renewable electric energy producer, present on Croatia’s market since 2021. As Domagoj Puljizovic/Poslovni Dnevnik writes, the well-known Norwegian Statkraft sees potential in this country with the opening of their new Croatian office.

Is Statkraft a new company in Croatia?

September the 20th, 2024 – The Norwegian Statkraft company has a brand new Croatian office. It is otherwise Europe’s largest renewable electric energy

producer, present on Croatia's market since 2021.

Will Croatia reach its energy goal by 2028?

The country is going to reach its 2030 goal of 3.5 GW of renewables, envisaged by the energy strategy, by 2028, Milatić added. Solar is leading the new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power.
