

Czech Energy Storage Products Company

Overview

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

Why is the battery storage industry growing in Czechia?

The Battery Storage industry in Czechia is growing rapidly, driven by the country's commitment to renewable energy and sustainability. Key considerations include the regulatory framework, which supports the integration of battery storage systems into the energy grid.

Will the Czech Republic become the fourth largest battery storage market in Europe?

It is forecasted by SolarPower Europe that the Czech Republic will become the fourth largest battery storage market in Europe in 2024, and the residential segment will provide 97% share thanks to the New Green Investments Programme.

Will the Czech solar market shift towards larger-scale solar and storage market?

With the residential segment dominating the storage market in the Czech Republic in the coming years, the Czech Solar Association (Solární Asociace)

also pointed out that it expects a shift towards larger-scale solar and storage market, given the potential of energy storage in balancing the grid and optimizing energy structure.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid *The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. *The system can hold 9.45 MWh of energy, three times the size of the ČEZ battery in Tušimice.
