

# Does Kyrgyzstan s new energy need energy storage

#### **Overview**

Why is energy policy important in Kyrgyzstan?

The current energy policy is considered as one of the key barriers to the developing the renewable energy sector in Kyrgyzstan. Hence, there is an immediate need to evaluate the formulated energy policy to investigate gaps and uncertainties.

Does Kyrgyzstan need heating?

Because of the country's geographical features, the energy need for domestic space heating is a key priority as compared to the energy need for lighting and cooking in Kyrgyzstan (IEA, 2020). Due to the long and harsh winter (-25 to -30°C in the mountainous areas), heating is a primary need for local people.

Why is Kyrgyzstan's energy sector deteriorating?

in Kyrgyzstan. Deteriorating infrastructure The deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produ.

Does Kyrgyzstan have a good power supply?

According to the results of the quality of energy delivering services survey in Kyrgyzstan made by the National Statistical Committee in 2015, "only 11.8 % of households had uninterrupted power supply, while 64.4 % had power cut several times a year and 0.5 % had daily power cuts" (National Statistical Committee of the Kyrgyz Republic, 2017).

How much CO2 does Kyrgyzstan produce?

higher than the global average. The Kyrgyzstan energy sector contributes to roughly 60%, 9.1 MT of CO2, of its total GHG emissions, where the residential energy consumption and the production of heat & electricity account for over 70.

### Why is Kyrgyzstan a re-based country?

Kyrgyzstan was the first country in Central Asia who implement RE-based law. It was the first source that regulates the country's renewable energy sector in terms of legal, organizational, economic, and financial relations.
