

# **Double-glass panels and buildings**

## Overview

---

What is a double pane glass wall?

As part of the DIRT construction system, the Double Pane Glass Wall delivers without compromise. Get the look and light transmission of glass walls with improved acoustic performance for speech privacy when you need it. All with short lead times, quick installation, and the ability to easily reconfigure your layout when your space requires it.

What is a double glass façade?

These envelopes can be formed as two distinct elements or as multiple layers of combined glazing for a performative or visual affect. Double glass façades combine different materials around unique framing, installation methods and structural support.

What is double glazed glass?

Double glazed glass is the way to go! Danpal facade glazing systems are one of the exciting ways that our products have redefined the construction industry. The outer walls of the system are designed not for a structural role but to prevent weather from penetrating inside.

Is double glazed glass a good investment?

Double glazed glass, on the other hand, is an excellent investment. Danpal's double polycarbonate sheet will give you all the advantages of glass and will be even more economical than glass. Danpal's engineers and design experts understand this. That's why our double skin facade system is so popular with architects and their clients.

What are the benefits of double layer insulation glass?

Improvements in coatings and double and triple layer insulation glass reduced the thermal losses through the transparent areas of a building. This impacts as side-effect the visual quality of glazed facades. The cavity of double skin

systems operates as thermal buffer and reduces the need for eye-catching coatings.

Are double skin facades a good choice for high-rise buildings?

The cavity of double skin systems operates as thermal buffer and reduces the need for eye-catching coatings. Double skin facades using natural ventilation for high-rise buildings had advantages in user comfort and a greater transparency. On contrary, double skin facades are faced with higher maintenance and cleaning cost.
