

# **Energy storage power station fire fighting equipment**

### **Overview**

Fire protection requirements for energy storage equipment include: compliance with national and local codes, installation of appropriate fire suppression systems, continuous monitoring for thermal runaway, and routine maintenance and inspection.

### **Energy storage power station fire fighting equipment**

#### Fire Protection in Power Generation

Prevent costly outages and equipment damage in power plants. Our suppression systems are built for turbines, transformers, and control rooms. Schedule a custom fire protection audit now!
