

European Battery Energy Storage System Project

Overview

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

How many MW of battery energy storage system Engie reaches in Europe?

With this new project, ENGIE reaches 500 MW of BESS capacity in Europe, either installed, under construction or at an advanced stage of development. On 31 October 2024, Belgian grid operator Elia announced the result of the country's 4th CRM auction and the selection of ENGIE's Battery Energy Storage System (BESS) project in Kallo.

What is the largest European battery-based energy storage project?

In May 2023, we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent to the daily consumption of almost 10,000 homes.

When was battery storage installed in Europe?

of battery storage capacity was installed in Europe at the end of 2023. Your expert for questions The European energy landscape is undergoing a profound change: the driver of this development is the ever-faster integration of renewable energy sources in order to reduce carbon emissions and achieve climate targets.

How important is battery storage in Europe?

The storage process can be done on the grid and individual buildings levels, which has made Europe a renowned home of energy storage technologies. To

further put the importance of battery storage in perspective, Europe needs a total of 187 GW of energy storage by 2030, 122 GW of which will be battery storage—that is about 65.24%.

How to generate revenue from battery energy storage systems in Europe?

To generate revenue from battery energy storage systems in Europe, companies need to be strategic and take advantage of different markets and services. Capacity markets, for example, offer a stable source of income: payment is made for the provision of reserve capacity.

European Battery Energy Storage System Project

Battery Energy Storage Systems in Europe

In this series of articles Coen Hutters, Pablo Ruiz, and Sanne de Boer explore the key factors shaping BESS investment models in Germany, the UK, France, Spain, Italy, and the ...
