

# Finnish solar energy

### **Overview**

The objective in solar heating is 163 000 m collector area (1995–2010). In 2006 the collector area in operation was 16 493 m . Solar heat in Finland was (1997–2004) 4-5 GWh and (2005) 6 GWh. Thus, Finland has installed 10% of its objective in 11 years time (1995–2010). The solar heating has not been competitive due to cheap alternatives (electricity, fuel oil and district heating) and the lack of support systems. Companies and public organizations may receive 40% investment sub.

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces.
