

French high-rise solar photovoltaic panels

Overview

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Who are the best solar energy companies in France?

Explore the top solar energy companies in France, like Photowatt and Akuo, that drive innovation in renewable solutions, boosting sustainability efforts.

What are the most significant solar power farms in France?

We'll be taking a close look at 15 of the most significant solar power farms in France below. Built by French renewable energy giant Neon, the Cestas Solar Park is France's largest operational solar project at the moment with an enormous 300 MW of total solar capacity.

Are our solar panels made in France?

Not all our panels are produced in France (yet). We select the world's best factories based on strict environmental and social criteria. Our panels are certified low-carbon. It's the least we can do. Our panels are built to last: the PV performance is guaranteed 30 years. Our technical teams are available to support you for free, for life.

What is France's largest solar project?

Built by French renewable energy giant Neon, the Cestas Solar Park is France's largest operational solar project at the moment with an enormous 300 MW of total solar capacity. Construction on the park began in late 2014 in Cestas, near the French border with Portugal, and the park came online in December 2015.

Which French solar projects use first solar?

The 67.5 MW Gabardan Solar Park in the Landes region of Southwestern France is another French solar project which uses First Solar's advanced thin-film PV modules. The park was developed by EDF Energies Nouvelles, and construction was contracted out to Schneider Electric.
