

French home energy storage policy

Overview

Are energy storage projects legal in France?

However, energy storage projects in France face several legal and commercial challenges. In particular, the current regulatory framework allows for energy storage, but there is no legal framework designed for its development.

Does France have a storage battery market?

The European residential storage battery market has grown significantly during the energy crisis, but it has remained relatively small in France. Nevertheless, battery manufacturers expect higher demand due to rising electricity prices. From pv magazine France.

How much storage capacity does France have?

In 2015, France had 5.82 GW of operational storage capacity, of which pumped storage comprised 5.81 GW. However electro-chemical storage is growing rapidly, in particular with lithium-ion batteries, with batteries accounting for nearly 52 per cent of the remaining storage capacity.

How many homes in France have PV systems?

French market research firm LCP Delta reports that approximately 566,000 homes in France had PV systems by the end of 2022, with around 2 GW of capacity. Among these systems, only 1,000 were equipped with home storage batteries, with average capacities of 4 kW.

What is French-property?

French-Property.com is the leading portal for property in France. Find homes, houses and properties of all styles for sale by private sellers, immobilier and estate agents throughout France.

Is the heat pump market mature in France?

"The heat pump market is mature in France, the very extensive offer of distributors and government incentives, via direct aid and tax credits, encourage individuals to equip themselves," said Jouannic. LCP Delta expects more than 1 million heat pump installations per year.
