

French offshore solar energy

Overview

Are French companies investing in solar power?

Two French companies, Redavia and France Panneaux Solaires, have invested heavily in solar power using subsidies to build profitable solar-panel installations on both commercial and residential scales. A third company, Saint-Gobain, is focused on technology, innovation, and manufacturing in this sector.

Why is solarinblue launching a 240MW project in France?

SolarinBlue's project comes as France is looking to further develop solar power. In April, French authorities announced plans to launch tenders to supply 240MW of solar power capacity along the country's highways. Sign up for our daily news round-up!.

Does solarinblue work with offshore wind farms?

SolarinBlue's technology is compatible with fixed and floating offshore wind farms, allowing shared connections to reduce infrastructure costs and increase renewable electricity production at the same site.

How will a solar farm work in Sète-Frontignan?

According to SolarinBlue, the solar farm will cover one hectare and is expected to produce more than 1.3 gigawatt-hours annually, with the electricity generated being transported via a submarine cable to the port of Sète-Frontignan, supporting the region's strategy to decarbonise energy consumption.

How will ADEME support a floating solar farm?

The programme, operated by the French Agency for Ecological Transition, ADEME, will support the Méga Sète pre-commercial demonstrator project for a floating solar farm in the Sète-Frontignan commercial port district, on the site of a former oil unloading station.
