

French road solar power system

Overview

How much money did France spend on the solar road?

France spent \$5.2 million on the solar road project. The road was 0.6 miles long and covered 30,000 square feet with solar panels.

Can a solar power system be used in France?

A solar power system can be used to supply all your energy needs, although in France it's usually combined with an electric or gas heating system, as solar power cannot usually be relied upon year-round for heating and hot water.

Is the French solar road too noisy?

It's too noisy, falling apart, and doesn't even collect enough solar energy. The French government invested in building a solar road to a rural town in 2016. The project has not delivered on its goals, according to French newspaper Le Monde. Solar streets face significant infrastructure challenges if they want to succeed.

Can Solar Streets succeed?

Solar streets face significant infrastructure challenges if they want to succeed. It was a solar experiment that seemed ingenious in its simplicity: fill a road with photovoltaic panels and let them passively soak up the rays as cars drive harmlessly above.
