

Gambia has Chinese communications 5G base stations

Overview

Does the Gambia have 5G?

Currently, none of the network operators in the Gambia are providing 5G services. Africell and QCELL are the only network operators currently providing 4G coverage and are both focused on expanding their 4G network nationwide. Internet connectivity into The Gambia is managed by Gamtel, with bandwidth sold to other ISPs.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

Does China have a 5G network?

With over 2.4 million base stations, the country accounts for more than 60% of all 5G infrastructure globally. The Chinese government, in partnership with major telecom providers like Huawei and China Mobile, has aggressively built this network to support industries, consumers, and digital transformation. Why does China have such a head start?

.

What is the telecom market composition in Gambia?

Gambia's telecom market is dominated by the state-owned Gamtel, which retains a monopoly on fixed-line telephony services. Four mobile networks provide effective competition. The market's leader is Africell (owned by American), with about 65% market share.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.
