

# **Greek rooftop photovoltaic panel size**

## Overview

---

Broad development of solar power in Greece started in the 2000s, with installations of skyrocketing from 2009 because of the appealing introduced and the corresponding regulations for domestic applications of . However, funding the FITs created an unacceptable deficit of more than €500 million in the Greek "Operator of Electr.

In terms of the current status, there are currently 375 MW of small-scale rooftop PV panels (<10 kW), accounting for 5.8% of the total installed PV capacity of 6.3 GW.
