

Guinea-Bissau power plant energy storage project construction

Overview

Near the capital Bissau, a 30 MWp solar power plant will be built with the aim of “reducing the average cost of electricity in the country and diversifying the energy mix, while battery storage will make it possible, in the first phase, to smooth the injection curve and, in the second phase, to provide services to the electricity system”, according to the Bissau-Guinean Ministry of the Economy, Planning and Regional Integration.
