

Heishan lithium battery energy storage equipment

Overview

What is Lishen battery?

Lishen Battery adopts the approach of "storage up" and "consumption up" for 20 years energy storage application scenario and "same life PV and storage". It also adopts advanced lithium slow-release technology, low lithium consumption negative technology and self recovery electro-hydraulic technology.

What is Lishen battery's performance in energy storage?

These accomplishments demonstrate Lishen Battery's leading position and continuous innovation capacity in energy storage Lishen Battery successfully developed 314Ah and 325Ah energy storage cell. 314Ah battery is expected to be in massive production in second quarter of 2024. The development of 325Ah battery A specimen will be over.

What is China's largest lithium-ion battery project?

The project combines 40MWh of sodium-ion batteries with the remainder lithium-ion and is the largest of its kind in China, the firm said, and therefore almost certainly the world.

What is Lishen energy storage cell?

Lishen energy storage cell caters to market and industry pain points. Adopting 280Ah cell size, it achieves significant upgrading of capacity and energy density without changing volumetric size through innovation and new design. In particular, energy density is over 180Wh/kg, a great breakthrough.
