

Home is suitable for installing photovoltaic solar panels

Overview

There are several ways to find out if your home might be a good fit for solar panels. Saving money and the planet through solar energy has a lot of appeal, but not every home is the ideal.

According to the California Energy Commission, a solar system needs unobstructed access to the sun's rays for most or all of the.

Google's Sunroof is only available in some locations. If you live in an area it doesn't cover, you can still determine how much sun your home gets with just a few steps. Nearby trees or buildings may block the sun. This could mean a substantial loss in energy output. To.

If you feel confident that your home is a good candidate, it is time to contact a professional. Although you can find a rough estimate of the.

Are solar panels worth it?

Saving money and the planet through solar energy has a lot of appeal, but not every home is the ideal candidate. Your home needs to get plenty of sunlight, have a roof that is big enough and faces the right direction, and you need to pay enough for electricity to make solar panels worthwhile.

Can solar panels be installed on a roof?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

Is solar energy a viable option for my home?

Here are some tips to help you decide if solar energy is a viable option for your home. According to the California Energy Commission, a solar system needs unobstructed access to the sun's rays for most or all of the day. The easiest way to check your home for solar viability is by typing your address into Google's Project Sunroof.

Which roof is best for solar panels?

East- and west-facing roofs are also a good option because they get a lot of sun. If your only available roof area for solar panels is north-facing or you don't have enough unobstructed room for panels, your home may not be a good candidate. Be sure you have room on your roof for solar panels.

Is your home a good candidate for a solar system?

If you feel confident that your home is a good candidate, it is time to contact a professional. Although you can find a rough estimate of the size of the solar system you need online, an exact number depends on a lot of different factors that most people won't be able to figure out on their own.

What is the best way to install solar?

The best way to install solar is through a qualified professional who holds a certification to do so and works with high-quality solar panels. The industry-standard certification is awarded through the North American Board of Certified Energy Practitioners (NABCEP). How can I avoid getting scammed while going solar?
