

Home solar system prices in Ghana

Overview

Let's cut to the chase: average prices range from \$0.50 to \$1.20 per watt as of March 2025, but that's just the tip of the iceberg. This article breaks down the real costs, hidden factors, and actionable strategies for homeowners and businesses navigating Ghana's solar market. Should you buy solar panels for your home in Ghana?

Before you buy solar panels for your home, research the different factors and decide which option is right for you in Ghana. Ghana has an average effective sunshine of 5.5 hours daily. As a considerable investment, it's worth evaluating a solar power system for your home before have it installed.

Why should you invest in solar power in Ghana?

Solar power, leveraging Ghana's abundant sunlight, provides a more stable and predictable cost. After the initial investment in solar panels and equipment, homeowners can enjoy years of virtually free electricity, with many systems paying for themselves within a few years.

How much does a polycrystalline solar panel cost in Ghana?

Polycrystalline solar panels are also cheaper than mono crystalline panels, though they are about 2% less efficient than Mono crystalline. Polycrystalline solar panels in Ghana usually cost between \$100-250 USD per panel.

Where can I get affordable solar power in Ghana?

REDAVIA provides affordable solar power in Ghana for both businesses and communities. Solar In Ghana, REDAVIA.

How much is the government investing in solar panels in Ghana?

The Ghanaian government, through Volta River Authority (VRA), has so far invested in a solar plant with 2.5 megawatts of power. Additionally, the government has committed GHC200,000.00 for a rooftop solar panel project, aiming to install panels on 200,000 homes.

What are the best solar panels in Ghana?

Polycrystalline (or multi-crystalline) silicon cell based solar panels are now the most popular choice in Ghana's residential installs. There are also Amorphous (or thin-film) silicon cells, which use the least amount of silicon and are not very efficient. For an equivalent wattage, a crystalline panel will be smaller than an amorphous panel.
