

Household Costs of Solar Systems in Cuba

Overview

How much solar energy is installed in Cuba?

The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity. And there are several projects underway to increase this percentage, although costs remain a serious obstacle. Increase in energy production from solar devices in Cuba since 2001:.

Where are the solar panels made in Cuba?

The solar panels used in the project are partly produced by the Cuban Electronic Industry -70 percent of all the solar panels were assembled in Pinar del Río, and 100 percent were installed by the Copextel company ran by the Ministry of Computer Science and Communications (MIC).

How much electricity does a Cuban House use?

With today's photovoltaic technologies, any Cuban house can in theory satisfy its own electricity needs, as well as that of neighboring residences. By the end of 2020, the average consumption of private clients in Cuba was 185 kilowatts/hour (kWh) per month: just over 2200 kWh per year.

How much does a solar panel cost?

"It seems the government has no real interest in people installing solar panels. They make announcements and give lots of 'lip service,' but in practice, there's nothing concrete," he told IPS. At state-run Copextel retail stores, a basic 1 KW generation module costs 2,551 MLC, pegged to the US dollar.

Is investing in Cuba becoming more difficult?

Investing in Cuba is becoming increasingly difficult," commented user Horus on an article about the issue published on Cubadebate, the country's most-read state news portal. The law could discourage entrepreneurship in small

industries or productive areas that typically consume significant electricity.
